

Shypoke

Spirits

Proudly made with the finest blend of certified organic grains

Shypoke Spirits was founded by Rick & Michelle Halverson with a vision of delivering fine organic spirits to you the consumer made from grains sourced through their organic flour milling business.

The “Shypoke,” or great blue heron is the trademarked logo of the parent company Great River Organic Milling Company or GROM. GROM is located in a quiet valley in west central Wisconsin near the banks of the Mississippi. Aptly named by Native Americans which translates to “Great River.” GROM has been delivering high quality NON GMO organic grain and flour to the artisan baking industry since the '70's. Our experience of working directly with the organic farmers in the Midwest region gives us the unique ability to source the best grains possible for our products. Grains used to make our products can be traced back to the farmer and the fields they were grown in which is paramount to our USDA organic certification. We truly hope you enjoy this and all the other Shypoke products.

Spirits

⇒ORGANIC⇐ VODKA

Shypoke Vodka is produced from the highest quality NON GMO Organic gluten free grains available. Grown in the Midwestern plains this blend of gluten free grains offers us the ability to produce the clean crisp, smooth taste of a truly fine vodka. The combination of high quality organic gluten free grains and a fine copper still allows us to produce what is in our opinion the finest organic vodkas on the market. On the rocks or with your favorite mixer we are sure you will enjoy the clean, crisp smooth taste that only the finest organic grains can produce.

⇒ORGANIC⇐ WHITE RUM

We make Shypoke White Rum from carefully selected organic cane sugar and organic molasses. We select our molasses for its distinctive character, which we carefully balance with the more subtle smooth flavor of organic sugar. Our artisan approach to small-batch distilling from scratch allows us to optimize our fermenting, distilling, and aging techniques to match the character of our organic ingredients. The result is a distinctive yet versatile rum that can be enjoyed straight or mixed.

⇒ORGANIC⇐ GIN

Most gins are made by adding botanicals to a flavorless alcohol base, whereas Shypoke Gin is made from organic grains to retain the smooth, subtle character of a truly premium gin. The smooth flavor is created by dispersing hints of distinctive grain character, while carefully selecting complimentary organic botanicals to achieve a flavor profile that cannot be found in any other gin.

⇒ORGANIC⇐ RUM

We make Shypoke Rum from carefully selected organic cane sugar and organic molasses. We select our molasses for its distinctive character, which we carefully balance with the more subtle smooth flavor of organic sugar. Our artisan approach to small-batch distilling from scratch allows us to optimize our fermenting, distilling, and aging techniques to match the character of our organic ingredients. The result is a distinctive yet versatile rum that can be enjoyed straight or mixed.

⇒ORGANIC⇐ WHISKEY

We make Shypoke Rye Whiskey from carefully selected organic rye, wheat, and oats. Our artisan approach to small-batch distilling from scratch allows us to match our grain with our mashing, fermenting, distilling, and aging techniques. The result is a whiskey that reveals all of the character the grain has to offer — which compliment each other and result in a distinctive premium rye whiskey like no other.
